

**TIMELESS DESIGN AND PATTERNS**

- Ten (10) polished and three (3) matte finish colors.

**TIME SAVING INSTALLATION**

- Typical installation of the system in six (6) hours or less.

**REPLACEABLE PANELS**

- Sustainability and future design in mind.
- NO need to demo the entire surround! Remove the 100% silicone from the joints, and panels can be removed with standard porcelain suction cups. The existing framework and PVC receivers remain.
- The new panels can be installed immediately.

**SIMPLE ACCESS TO PLUMBING**

- Same method as replacement of panels if there is a plumbing failure.

**CONTRACTOR FRIENDLY**

- Composite modular shower surround system that is mechanically attached to traditional stud framing without the use of thin-set OR adhesive.
- Only simple construction skills are needed to measure, install system components, cut composite panels and attach panels with interlocking devices.
- Composite panels can be easily cut in the field using a hand-held angle grinder.

**DRY INSTALLATION**

- NO thin-set OR adhesive needed to install panels.

**NO THINSET**

- Composite panels are mechanically attached.

**NO GROUT**

- Expansion and butt joints use 100% silicone.

**MINIMAL SEAMS**

- Two (2) vertical expansion joints and one (1) contiguous butt joint.

**EASY TRANSIT TO JOBSITE**

- Complete system in custom packaging that fits in standard van and pick-up bed.

Proven advanced proprietary marine environment adhesive provides the bond for the composite system to ensure product longevity and water resistance.
